Chemical Sciences

Editor

V Krishnan

Indian Institute of Science, Bangalore

Associate Editor

S Chandrasekaran

Indian Institute of Science, Bangalore

Editorial Board

B Bagchi, *Indian Institute of Science, Bangalore*
D Balasubramanian, *Centre for Cellular and Molecular Biology, Hyderabad*
S Bhaduri, *Alchemie Research Centre, Thane*
A Chakravorty, *Indian Association for the Cultivation of Science, Calcutta*
B M Deb, *Punjab University, Chandigarh*
S R Gadre, *University of Poona, Pune*
K N Ganesh, *National Chemical Laboratory, Pune*
U R Ghatak, *Indian Association for the Cultivation of Science, Calcutta*
Harjit Singh, *Guru Nanak Dev University, Amritsar*
D V S Jain, *Panjab University, Chandigarh*
E D Jemmis, *University of Hyderabad, Hyderabad*
H Junjappa, *North Eastern Hill University, Shillong*
S S Krishnamurthy, *Indian Institute of Science, Bangalore*
G Mehta, *University of Hyderabad, Hyderabad*
S Mitra, *Tata Institute of Fundamental Research, Bombay*
C N R Rao, *Indian Institute of Science, Bangalore*
Surjit Singh, *Indian Institute of Technology, Madras*
J S Yadav, *Indian Institute of Chemical Technology, Hyderabad*

Editor of Publications of the Academy

G Srinivasan

Raman Research Institute, Bangalore

Subscription Rates

(Effective from 1989)

All countries except India	1 year	3 years	5 years
(Price includes AIR MAIL charges)	US$125	$340	$500
India	1 year	10 years	
	Rs. 75	Rs. 400	

All correspondence regarding subscription should be addressed to **The Circulation Department** of the Academy.

"Notes on the preparation of papers" are printed in the last issue of every volume.

Proceedings (Chemical Sciences)

Volume 102, 1990

CONTENTS

Inorganic and Analytical

Electron energy loss spectroscopic study of $Cr(CO)_6$, $Mo(CO)_6$ and $W(CO)_6$ in the vapour phase *S Pradeep* 1–5

Kinetics and mechanism of Ru(III)–catalysed oxidation of amino acids by N–chloro–N–sodio–toluene–*p*–sulphonamide in acid media *B Thimme Gowda and P Ramachandra* 7–17

Mixed ligand complexes of cadmium(II) involving nitrilotriacetic acid *Mohamed M Shoukry* 19–24

Electroanalytical study of the anodic wave of 5-nitroorotic acid *J Rodriguez Flores, L Calvo Blazquez, C Marin Sanchez and A Sanchez Misiego* 25–29

Unsymmetrically ligated dioxobridged Mn(III, IV) complexes – synthesis and spectral studies *G Swarnabala and M V Rajasekharan* 87–98

Spectral and magnetic investigations on some binuclear oxovanadium compounds *P S Zacharias, M Athar Masood and J Mary Elizabethe* 99–105

Isolobal analogy between trivalent boron and divalent silicon *Eluvathingal D Jemmis, Bharatam V Prasad, P V A Prasad, Seiji Tsuzuki and Kazutoshi Tanabe* 107–115

Surface acidity in promoted molybdena and tungsta dehydrosulphurisation catalysts *M O Alias and V Srinivasan* 117–129

Singlet quenching of tetraphenylporphyrin and its metal derivatives by iron(III) coordination compounds *Francis D'Souza and V Krishnan* 131–146

Kinetics of oxidation of S–N donor ligands by hydrogen peroxide *B Thimme Gowda and Pardhasaradhi Vasireddy* 463–469

Kinetics and mechanism of oxidation of carbohydrazide by chloramine-T and bromamine-T in aqueous perchloric acid medium *B Thimme Gowda and P Ramachandra* 471–479

Analysis of the coordination geometry in copper complexes *C Ramakrishnan and Y S Geetha* 481–496

Studies on the complexation behaviour of dehydroacetic acid-4-methyl-2-quinolylhydrazone with bivalent metal ions *B S Garg, Ranjana Dixit and Indira Das* 497–502

Magnetic and spectral studies of transition metal complexes of salicylaldehyde-2-aminoacetophenone-2-thenoylhydrazone *B Singh and A K Srivastava* 503–511

Study of the effect of nature of ligand on reproportionation constants of ternary complexes *M R Ullah and P K Bhattacharya* 513–519

Diethylenetriamine *bis*(dithiocarbamato) derivatives of some first row transition metals *P K Gogoi and D P Phukan* 725–730

Stability and structure of Cu(II) and Zn(II) ternary complexes with L-glutamic acid and some diaminocarboxylic acids *M Sivasankaran Nair, S Theodore, D Manickam, P Thillai Arasu and C Natarajan* 731–736

Organic

Synthesis and characterization of 2-hydroxy-4-methoxyacetophenone–urea–formaldehyde resins and their ion-exchange properties *K D Patel and M M Patel* 31–38

Synthesis of amides and peptides using polymer-bound mixed carboxylic dithiocarbamic anhydrides *K S Devaky and V N Rajasekharan Pillai* 521–533

Synthesis and biological activity of 4-(N-arylidene acetyl-hydrazido)-1, 4-benzothiazin-2,3-diones, azetidinones and thiazolidinones *M Hogale and A Uthale* 535–540

Alkoxylation sites in naturally occurring coumarins using ^{1}H NMR *S B Kalidhar* 737–740

Physical and Theoretical

Crystal and molecular structure of 3-benzoylpropionic acid *S Selladurai, M Senthil Kumar and K Subramanian* 39–43

Conformations of α, β-unsaturated ketones: An IR spectroscopic study *G Venkateshwarlu and B Subrahmanyam* 45–50

Topological solution of algebraic eigenvalue problem *Kali Kinkar Datta* 51–64

Oxidation of secondary alcohols by sodium N-bromobenzene sulphonamide: A kinetic study *K Mohan, D S Mahadevappa and Puttaswamy* 65–72

Photoconductive properties of zeaxanthin in a sandwich cell *Dilip Ghosh, Prabir Pal and T N Misra* 73–80

Nucleophilic substitution reactions in solution – A molecular orbital approach *B H Bhide, M B Bhide and Arabinda Ray* 81–86

One-electron oxidation of toluidine blue. A pulse radiolysis study *J Mahadevan, S N Guha, K Kishore and P N Moorthy* 147–157

Theoretical conformational study of the molecular structures of some bipyridine cardiotonics *Apurba Krishna Bhattacharjee* 159–163

Laser Raman spectroscopic study of photoreaction dynamics in *p*-chlorocinnamic acid crystal *Subhasis Chakrabarti, M Gantait and T N Misra* 165–172

Isotope heat effect in reactions involving hydrogen evolution on palladium catalyst particles *O I Lomovsky, A F Eremin and V V Boldyrev* 173–176

Cyclic voltammetric studies on gallium film electrodes in alkaline media *A Varadharaj and G Prabhakara Rao* 177–187

Physico-chemical investigation of fast ion conducting AgI-Ag_2SeO_4 glasses *M C R Shastry and K J Rao* 541–553

Studies on silver–silver carboxylate indicator electrodes: Part I. The silver–silver acetate electrode *Abha Rani Rai and Mukhtar Singh* 555–561

Effect of dodecyl trimethylammonium bromide on electrocrystallization of copper *B S Sheshadri and P B Rotti* 741–750

MNDO-EHP method for the calculation of vertical excitation energies *A K Chandra and M Banerjee* 751–758

Study of trends in charge-transfer absorption maxima of some π-type molecular complexes using graph-theoretical techniques *Debes K Das, Asok K Mukherjee and Ivan Gutman* 759–767

Planar 'coupled water pair' cluster in disordered solids: Theory of the ^{1}H NMR dipolar Hamiltonian *P Raghunathan and Siddharth S Ray* 769–780

Special Issue on Modern Trends in Inorganic Chemistry

Foreword *Samaresh Mitra* 193

Ferroverdin: Cation variation and recognition of isomeric *tris* chelate geometries by iron oxidation states *Surajit Chattopadhyay, Partha Basu, Debashis Ray, Samudranil Pal and Animesh Chakravorty* 195–202

Chiral recognition through clays *Vishwas Joshi, Dilip Kotkar and Pushpito K Ghosh* 203–208

Model compounds for the type III site and the combined type II and type III sites in multicopper oxidases *Ray J Butcher, Ekk Sinn and Garry M Mockler* 209–218

Chromate reductase activity: Characterization of Cr(VI) to Cr(III) conversion *Ch Pulla Rao, P S Sarkar, Sharada P Kaiwar and S Vasudevan* 219–230

Thermodynamic fitness of an $Ru^{III}(EDTA)/Ru^{V}=O(EDTA)$ couple in the oxygen atom transfer reactions *M M Taqui Khan, A Prakash Rao, S A Samad, Debabrata Chatterjee, S D Bhatt and R R Merchant* 231–237

Carbonyl complexes as homogeneous and supported catalysts *S Bhaduri* 239–246

Homogeneous catalysis of epoxidation of olefins by mono- and binuclear Schiff base complexes *P K Bhattacharya* 247–254

Some new aspects of lanthanide optical spectroscopy: Circular dichroism and two-photon absorption *Mihir Chowdhury, A K Banerjee, T Kundu, L Kundu and T Chakraborty* 255–268

Structure–function relationship in some macrocyclic dicopper complexes *K Nag* 269–282

Organometallic chemistry of diphosphazane ligands *S S Krishnamurthy* 283–290

Resonance Raman studies of metalloporphyrins *A L Verma, G S S Saini and N K Chaudhury* 291–306

Spectroscopic studies on monomers and dimers of thiaporphyrins *R P Pandian, Damodar Reddy, N Chidambaram and T K Chandrashekar* 307–318

Studies on photochemically produced metal complexes with coordinated free radicals *E Natarajan, P Ramamurthy and P Natarajan* 319–328

Design, synthesis and study of mixed-ligand metal (Pt, Pd, Ni) complexes as photosensitizers for photo-oxidation reactions *T S Srivastava and S Shukla* 329–335

Metal ion environment in reconstituted hemoglobins and myoglobins *P T Manoharan* 337–352

Models of the cytochromes-b and related heme proteins *O K Medhi* 353–364

Newer manifestations of reactivity of coordinated peroxide at metal and non-metal centres *Manish Bhattacharjee, Mihir K Chaudhuri and Nashreen S Islam* 365–377

Structure and bonding in metallocenes and oligomers *Eluvathingal D Jemmis and A Chandrasekhar Reddy* 379–393

Tellurium as a bridging ligand in cluster synthesis *Pradeep Mathur, Ipe J Mavunkal, B H S Thimmappa, V Rugmini and B B S Shastri* 395–402

Charge, spin and theoretical densities in transition metal complexes *B N Figgis* 403–414

Abstracts of posters presented at the symposium 415–462

Special Issue on Raman Spectroscopy and its Applications

Foreword — *S B Banerjee* — 563

Raman induced phase conjugation spectroscopy — *B Raghavendra Prasad, R Krishna Mohan, C K Subramanian and P S Narayanan* — 565–574

Density of states of fractons on percolating networks — *T Nakayama and K Yakubo* — 575–579

Superlocalization of fracton wavefunctions excited on percolating networks — *K Yakubo and T Nakayama* — 581–584

Effect of doping on stimulated Brillouin scattering in semiconductors — *P Aghamkar and P K Sen* — 585–592

Raman scattering of ZnSe grown by molecular beam epitaxy — *K Kumazaki and K Imai* — 593–599

Einstein-like phonons in InSe — *K Imai, K Kumazaki, S Seto, K Yamaya and Y Abe* — 601–605

Raman scattering in narrow-gap semiconductors — *Kenji Kumazaki* — 607–611

Laser Raman spectroscopy of colloidal semiconductor photosensitizers — *S Umapathy and R E Hester* — 613–628

Raman scattering in magnetic materials — *R A Yadav* — 629–634

Laser Raman spectra and free and restricted rotation in phenyl silicates — *M N Dixit, N S K Prasad and V B Kartha* — 635–641

Resonance Raman scattering in mercury telluride — *M N Bansal and Alka Ingale* — 643–652

Depolarization ratio of low-frequency hydrogen bond Raman bands for semicrystalline pyrazinamide — *A K Kalkar, N M Bhosekar and S T Kshirsagar* — 653–659

Vibrational spectra of 1,6-dichlorohexane, *n*-chloro-, 2-chloro- and 3-chlorohexanes — *R M P Jaiswal, R K Garg and G A Crowder* — 661–667

Rotational relaxation times from Raman band profiles for benzonitrile in different solvents — *H A Ahmed and G Thyagarajan* — 669–675

Laser Raman spectra of 2,4- and 2,2′-dibromophenols — *S Mohan* — 677–679

Laser Raman and infrared studies on hydrotropes and related materials — *S B Kartha, V G Gaikar, M M Sharma and V B Kartha* — 681–685

Vibrational Raman spectra of some substituted uracils — *J N Rai* — 687–691

Raman spectroscopic study of the environment of tryptophan residues in bovine α-lactalbumin — *H Van Dael, E Tieghem and F Van Cauwelaert* — 693–696

Laser Raman spectroscopic studies on the interaction of drug Dapsone with model membranes *V B Kartha, N D Patel and S Venkateswaran* 697–703

Raman and infrared spectra of starch samples of sweet potato and cassava *N Santha, K G Sudha, K P Vijayakumari, V U Nayar and S N Moorthy* 705–712

Applications of laser Raman and FT–IR techniques to leprology, neurology, bacteriology and traumatology *S Mishra, Ravindra Kumar, S K Aryal, S Kumar, Rajesh Kumar and M M Bajaj* 713–720

Temperature and radiation effects on the Raman bands of epoxy resin *V Janarthanan and G Thyagarajan* 721–724

Rapid Communication

Nonexistence of local maxima in molecular electrostatic potential maps *Shridhar R Gadre and Rajeev K Pathak* 189–192

Subject Index 781–795

Author Index 796–803
